DETAILED ACTION

Election/Restrictions

1. The inventions are distinct, each from the other because of the following reasons:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-4, 6, 8-11, 12, drawn to a method for identifying a compound as a candidate for a herbicide which binds the polypeptide, classified in class 435, subclass 15.

II Claims 5, 7, drawn to a method for identifying a compound as a candidate for a herbicide by measuring herbicidal activity in terms of growth and viability of plant cells or plant, classified in class 514, subclass 789.

III. Claims 13-16, drawn to a method for identifying a compound as a candidate for an herbicide by measuring the expression of BS mRNA in plant cells or in plant, classified in class 435, subclass 6.

IV. Claim 13-15 and 17, drawn to a method for identifying a compound as a candidate for an herbicide by measuring the expression of BS polypeptide in plant cells or in plant, classified in class 435, subclass 15.

The inventions are distinct, each from the other because of the following reasons:

2. The methods of Groups I-IV are unrelated and patentably distinct as they comprise unrelated steps, use different products and produce different effects.

Art Unit: 1652

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37CFR 1.48b if one or more of the currently named inventors are no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (i).
